General Notes:

- a. Must use MDB Coin Mech and Validator on all models and manufacturers except Dixie Narco (will accept non-MDB validator)
- b. For Dixie Narco and AP models - to recharge key, customer must put \$ in first
- c. For all models - consult machine service manual for settings to vend and recharge Paykey
- d. Some validators may stack bills which will not allow Paykey to take credit - check validator type to ensure it will accept credit and check configuration setting
- e. When using Vending Machine as a Paykey Recharge Station determine machine make and model and post instruction plate on machine

Specific Notes:

- Note 1 To use Coke Dixie Narco as a V.M. Paykey Charge Station, change control board to Generic or Pepsi with a 391.11 Eprom version
- Note 2 (a) MARS 24v - 400 series (b) COINCO Quantum 24v (c) Conlux CCM 24 v
- Note 3 (a) MARS VM2512 24v (minimum set to accept \$5.00 bills) (b) COINCO Mag 50B 117v (minimum set to accept \$5.00 bills) - Mag 32R (c) Conlux
- Note 4 Required MFG MDB harness.
- Note 5 Required MFG MDB harness connected to the PAYKEY multi-input control harness.
- Note 5a Use APi harness part # 0-03-0002-00-8 --- 8 feet long -- run harness along top of door and then along top of cabinet door to validator
- Note 6 Paykey "**Special Key by Sales**" can be used to retrieve sales made by key
- Note 7 Machine model can be used to accept cash to recharge key (**Recharge Station**)
Paykey - "**Special Key Revalue**" used to retrieve data.
- Note 8 Use PAYKEY stamping die to cut out slot for the PK1 FLASH reader at suggested location.
- 8.a location of PK1 reader is located on plexi sign to left of validator on Bubble Front and Live Display machines
 - 8.b location of PK1 reader is located just above bill validator where instruction panel is to be removed.
 - 8.c location of PK1 reader is to be in PK1 bracket MN:1001 mounted just above bill validator .
with a required cut out in the exterior machine door.
 - 8.d location of PK1 reader is in plastic plate just above validator. Use dremel tool to cut plastic plate.
For Crane Nationa/GPL, remove SureVend plate and install Craneplate (sold by PAYKEY)
 - 8.e use Paykey universal MDB metal install plate
- Note 9 There are massive changes between the 1999 version 684.02A monetary and the present version of monetary. If you get the latest version of 684 software - part number 6846015 - version 684.05 - it should work. Version 684.03 release notes mention improving compatibility with various card readers.
- Note 10 Cut door to mount a surface mounted Paykey reader. Contact Paykey to order surface mount kit (\$25).
- Note 11 Eprom listed is most recent revision - test machine or contact Paykey.
